# SOLUTIONS

## SUPPLY CHAIN MANAGEMENT

Supercharge every link in the supply chain – save time, reduce paper and boost collaboration between your team, subcontractors and stakeholders. Transform your processes into a tightly woven unit with software designed for construction.

## FINANCE & OPERATIONS

Streamline planning, forecasting, financial processes, payroll and reporting across your entire business to deliver projects on time and on budget. Rely on accurate, real-time data to monitor and keep track of construction schedules and budgets, making informed decisions at every stage.

## PROJECT DELIVERY

Ensure your team can access and update project information on a single platform from anywhere and any device. Deliver projects smarter with an integrated approach to billing, document management, issue resolution and more.

## TIME MANAGEMENT

Review up-to-the-minute time and attendance data across a specific construction site, or the entire company, as well as the status of owned or third-party assets, such as equipment or machinery, all stored on one single cloud-based platform.

## SERVICE MANAGEMENT

Deliver compliance and quality by integrating all aspects of service operations from agreements, billing and maintenance, to visit scheduling and dispatch. Increased visibility of information enables the back office, executives and site teams to avoid mistakes, and work faster and smarter.

# Don't wait until it's too late

- ✓ Identify problems before they arise.
- ✓ Deliver projects on time and on budget.

## One System, Complete Control

Manage projects, labour and finances with ease.

Partner with a software provider that genuinely understands the complexities of construction and the day-to-day challenges business managers face.
